Non-Surgical Treatments

Our non-surgical practitioners have over 15 years experience and are based at our privately owned hospital. They are specialists in non-surgical procedures and provide fantastic results. We offer FREE consultations.

Dermal Fillers

Dermal fillers are used to add volume, re-contour, fill and smooth out lines, wrinkles, scars and more. Dermal fillers can also be used in the lips to contour and add plumpness.

As we grow older, our skin loses moisture and elasticity and begins to show the signs of ageing. Juvéderm® facial fillers can gently ease wrinkles and add volume in a subtle way. Get back to the more natural you, with the Juvéderm® range of facial fillers, loved by millions worldwide.

Wrinkle Reducing Injections

Anti-wrinkle injections for the muscle

Botulinum Toxin Type A is used in the forehead and around the eyes to inhibit muscle action thereby decreasing lines and wrinkles.

Botulinum Toxin Type A can also be used for excessive perspiration on the underarms and palms.

Advanced Cosmetic Procedures

Advanced Cosmetic Procedure (ACP) treatments using Electrolysis are becoming increasingly popular. A wide range of skin blemishes can be quickly and easily treated with immediate and effective results offering an eventual blemish free smooth skin. Price for each treatment will be discussed during your free consultation.

Facial Rejuvenation Treatments

We offer a range of skin treatments to combat the signs of ageing. Common problems such as sun damage, age spots, wrinkles, pigmentation and acne scarring can all be treated with the aim of removing dead skin cells to encourage stimulation of collagen and elastin to rejuvenate the skin for a more youthful, brighter appearance.
